Fifty-ninth session

Agenda item 39 (a)

Strengthening of the coordination of humanitarian and disaster relief assistance of the United Nations, including special economic assistance: strengthening of the coordination of emergency humanitarian assistance of the United Nations

Qatar:* draft resolution

International cooperation on humanitarian assistance in the field of natural disasters, from relief to development

The General Assembly,

Reaffirming its resolution 46/182 of 19 December 1991, the annex to which contains the guiding principles for the strengthening of the coordination of emergency humanitarian assistance of the United Nations system, as well as all its resolutions on international cooperation on humanitarian assistance in the field of natural disasters, from relief to development, and recalling the resolutions of the humanitarian segments of the substantive sessions of the Economic and Social Council,

Recognizing the importance of the principles of neutrality, humanity and impartiality for the provision of humanitarian assistance,

Emphasizing that the affected State has the primary responsibility in the initiation, organization, coordination and implementation of humanitarian assistance within its territory and in the facilitation of the work of humanitarian organizations in mitigating the consequences of natural disasters,

Emphasizing also the importance of integrating risk reduction into all phases of disaster management, development planning and post-disaster recovery,

Emphasizing further, in this context, the important role of development organizations in supporting national efforts to mitigate the consequences of natural disasters,

Emphasizing the responsibility of all States to undertake disaster preparedness, response and mitigation efforts in order to minimize the impact of natural disasters, while recognizing the importance of international cooperation in support of the

* On behalf of the States Members of the United Nations that are members of the Group of 77 and China.

efforts of affected countries which may have limited capacities to fulfil this requirement,

Recognizing the important role played by the International Strategy for Disaster Reduction,

Stressing that national authorities need to enhance the resilience of populations to disasters through, inter alia, implementation of the International Strategy for Disaster Reduction so as to reduce risks to people, their livelihoods, the social and economic infrastructure and environmental resources,

Welcoming the efforts of the Inter-Agency Task Force for Disaster Reduction in preparing for the World Conference on Disaster Reduction, to be held at Kobe, Hyogo, Japan, from 18 to 22 January 2005,

Noting the critical role played by local resources, as well as by existing in-country capacities, in natural disaster response,

Recognizing the significant role played by national Red Cross and Red Crescent societies in disaster preparedness and risk reduction, disaster response, rehabilitation and development,

Emphasizing the importance of raising awareness among developing countries of the capacities existing at the national, regional and international levels that could be deployed to assist them,

Emphasizing also the importance of international cooperation in support of the efforts of the affected States in dealing with natural disasters in all their phases, including prevention, preparedness, mitigation and recovery and reconstruction, and of strengthening the response capacity of affected countries,

Recognizing that prevention, preparedness to address and mitigation of the adverse effects of natural disasters is inextricably linked to promoting sustainable development,

Welcoming the efforts of Member States, with facilitation by the Office for the Coordination of Humanitarian Affairs of the Secretariat and in cooperation with the International Search and Rescue Advisory Group, to improve efficiency and effectiveness in the provision of international urban search and rescue assistance, and in this context noting its resolution 57/150 of 16 December 2002 entitled "Strengthening the effectiveness and coordination of international urban search and rescue assistance",

Recognizing the International Search and Rescue Advisory Group and the United Nations Disaster Assessment and Coordination system as useful tools, and encouraging, in this regard, efforts aimed at the strengthening of those groups, particularly through the participation in their activities of representatives of a larger number of countries,

Mindful of the effects that shortfalls in resources can have on the preparedness for and response to natural disasters, and underscoring, in this regard, the need to gain a more precise understanding of the impact of levels of funding on natural disaster response,

Underlining the need for further improvement in information and analyses available regarding needs, responses and funding related to natural disasters,

1. *Takes note* of the reports of the Secretary-General entitled “International cooperation on humanitarian assistance in the field of natural disasters, from relief to development”¹ and “Strengthening the coordination of emergency humanitarian assistance of the United Nations”;²

2. *Expresses its deep concern* at the high number and scale of natural disasters and their increasing impact, resulting in massive losses of life and property worldwide, in particular in vulnerable societies lacking adequate capacity to mitigate effectively the long-term negative social, economic and environmental consequences of natural disasters;

3. *Calls upon* all States to adopt, where required, and to continue to implement effectively necessary legislative and other appropriate measures to mitigate the effects of natural disasters and integrate disaster reduction into development planning, inter alia, by disaster prevention, including appropriate land use and building regulations, as well as disaster preparedness and capacity-building in disaster response and mitigation, and requests the international community to continue to assist developing countries in this regard;

4. *Stresses*, in this context, the importance of strengthening international cooperation, particularly through the effective use of multilateral mechanisms, in the provision of humanitarian assistance through all phases of a disaster, from relief and mitigation to recovery plus development, including the provision of adequate resources;

5. *Also stresses* that humanitarian assistance for natural disasters should be provided in accordance with and with due respect for the guiding principles contained in the annex to resolution 46/182 and should be determined on the basis of the human dimension and needs arising out of the particular natural disasters;

6. *Recognizes* that economic growth and sustainable development contribute to improving the capacity of States to mitigate, respond to and prepare for natural disasters;

7. *Reaffirms* that disaster risk analysis and vulnerability reduction form an integral part of humanitarian assistance, poverty eradication and sustainable development strategies and need to be considered in the development plans of all vulnerable countries and communities, including, where appropriate, in plans relating to post-disaster recovery and transition from relief to development, and affirms that within such preventive strategies, disaster preparedness and early warning systems must be further strengthened at the country and regional levels, inter alia, through better coordination among relevant United Nations bodies and cooperation with Governments of affected countries and regional and other relevant organizations with the aim of maximizing the effectiveness of natural disaster response and reducing the impact of natural disasters, particularly in developing countries;

8. *Emphasizes* the importance of establishing or updating, as appropriate, national disaster preparedness plans, as agreed upon at the twenty-seventh International Conference of the Red Cross and Red Crescent, held at Geneva in 1999;

¹ A/59/374.

² A/59/93-E/2004/74.

9. *Also emphasizes* the importance of enhanced international cooperation, including through the United Nations and regional organizations, to assist developing countries in their efforts to build capacities and to predict, prepare for and respond to natural disasters;

10. *Stresses* the need for partnerships among Governments, organizations of the United Nations system, relevant humanitarian organizations and specialized companies to promote training to strengthen preparedness for and response to natural disasters;

11. *Calls upon* the United Nations to address knowledge gaps in disaster management and risk reduction by identifying ways of improving systems and networks for the collection and analysis of information on disasters, vulnerability and risk and to facilitate informed decision-making;

12. *Stresses* the need to promote the access to and transfer of technology related to early warning systems and to mitigation programmes to developing countries affected by natural disasters;

13. *Encourages* the further use of space-based and ground-based remote-sensing technologies for the prevention, mitigation and management of natural disasters, where appropriate;

14. *Also encourages* in such operations the sharing of geographical data, including remotely sensed images and geographic information system and global positioning system data, among Governments, space agencies and relevant international development and humanitarian organizations, as appropriate, and notes in that context initiatives such as those undertaken by the International Charter on Space and Major Disasters and the Global Disaster Information Network;

15. *Stresses* that particular international cooperation efforts should be undertaken to enhance and broaden further the utilization of national and local capacities and, where appropriate, regional and subregional capacities of developing countries for disaster preparedness and response, which may be made available in closer proximity to the site of a disaster, more efficiently and at lower cost;

16. *Urges* the United Nations, together with its development partners, to strengthen efforts to identify practical ways to channel resources to and strengthen support for national disaster management capacities in disaster-prone countries;

17. *Recognizes*, in this regard, that the United Nations Disaster Assessment and Coordination system continues to be a valuable tool by which disaster management expertise is made available by Member States to respond to the sudden onset of emergencies;

18. *Welcomes* the role of the Office for the Coordination of Humanitarian Affairs of the Secretariat as the focal point within the overall United Nations system for the promotion and coordination of disaster responses among United Nations humanitarian agencies and other humanitarian partners;

19. *Takes note with interest* of the initiatives taken by the Office for the Coordination of Humanitarian Affairs and the United Nations Development Programme for the establishment of regional positions of disaster response advisers and disaster reduction advisers to assist developing countries in capacity-building

for disaster prevention, preparedness, mitigation and response in a coordinated and complementary manner;

20. *Encourages* further cooperation between the United Nations system and regional organizations in order to increase the capacity of these organizations to respond to natural disasters;

21. *Encourages* States that have not acceded to or ratified the Tampere Convention on the Provision of Telecommunication Resources for Disaster Mitigation and Relief Operations, adopted at Tampere, Finland, on 18 June 1998, to consider doing so;

22. *Requests* the Secretary-General, in view of the rapid advances in technologies and software for disaster response, to seek information from Member States in order to develop further and continue to support the Central Register of Disaster Management Capacities, including through the provision of information on advanced disaster technologies and on disaster mitigation capacity at national, regional and international levels;

23. *Encourages* donors to consider the importance of ensuring that assistance in the case of higher-profile natural disasters does not come at the expense of those that may have a relatively lower profile, bearing in mind that the allocation of resources should be driven by needs, as well as the importance of making efforts to increase the level of assistance for disaster reduction and preparedness programmes and for disaster response and mitigation activities;

24. *Requests* the Secretary-General to examine ways to further improve the assessment of needs and responses and to enhance the availability of data regarding funding in response to natural disasters and to consider concrete recommendations to improve the international response to natural disasters, as necessary, based on his examination, keeping in mind also the need to address any geographical and sectoral imbalances and shortfalls in such responses, where they exist, as well as the more effective use of national emergency response agencies, and to report thereon to the General Assembly at its sixtieth session.
